## **1.0 INTRODUCTION**

Aggregate resources in the Province of Ontario are regulated under the Aggregate Resources Act, where aggregate activities occur on provincial lands and most private lands (MNRF 2012a). The Ministry of Natural Resources and Forestry (MNRF) manages aggregate resources in collaboration with the Ministry of Northern Development and Mines and the Ontario Aggregate Resources Corporation. Aggregate Designated Areas are established to prohibit the extraction of aggregates on lands without a license or permit. Within these Aggregate Designated Areas, proponents must apply for an aggregate permit or license to operate Authorized Aggregate Sites. The Ministry of Transportation (MTO) also maintains aggregate pits to provide the material necessary to build roadways in the Province. *Policy A.R. 1.00.08, Delegation of Authority: MTO (2000)* delegates duties and powers of the MNRF to MTO for the issuance and management of wayside permits and aggregate permits for provincial road projects (MNRF 2000).

The Project Commercial (Industrial) Land and Resource Use Local Study Area (LSA) overlaps 70 aggregate permits and licenses on provincial and private lands (Table 19-III-1). Of these 70 permits and licenses, 13 directly overlap the Project footprint (Table 19-III-2).

The Project Commercial (Industrial) Land and Resource Use Local Study Area (LSA) overlaps 29 MTO aggregate permits (Table 19-III-3). Of these 29 permits, nine directly overlap the Project footprint (Table 19-III-4).
